As to claims 1, 11, 15 and 17, the prior art of record, taken alone or in combination, fails to disclose or render limitations “ a **non-linear amplifier or selector to select the range of the measurement circuitry based on the magnitude of the signal to be measured**”, in combination with the rest of the limitations of claims 1, 11 and 15.

As to claim 12, the prior art of record, taken alone or in combination, fails to disclose or render limitations “ **range selection circuits responsive to the non-linear amplifier to provide range selection signals for use to select operating range of such measurement circuitry**”, in combination with the rest of the limitations of claim 12.

As to claim 16, the prior art of record, taken alone or in combination, fails to disclose or render limitations “ a **logarithmic amplifier responsive to a representation of the optical power of the incident light for providing a non-linear output representing of such optical power**” and “**comparator circuitry responsive to such non-linear output for selecting the operative range of the measuring system**”, in combination with the rest of the limitations of claim 16.

As to claim 19, the prior art of record, taken alone or in combination, fails to disclose or render limitations **"compressing the dynamic range of the measured signal for measurement by the measurement circuitry operative in a respective range"**.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
